

Medical Spa at Foot Specialist Associates

Your comfort and health is our focus at the medical spa. We welcome everyone including those with fungal nails and people with diabetes. Spa products and procedures are carefully selected to accommodate all skin types and are safe for diabetics. Our individual spa sessions create a relaxing atmosphere where our procedures and products ensure safety and luxury. Our tools are medically sterilized between services to prevent cross contamination. If you would like polish applied as part of your service, we ask you bring your own or you can purchase new polish from our spa for \$5-\$8. The polish is yours to keep. Services are not covered by insurance. If you have any openings or infections in the skin, we will not be able to provide any of these services. Shellac, Gels, or artificial nails need to be removed before your appointment.

To schedule your appointment call: 303-722-6864
